PROFILE

Computer Engineer specialized in AI and Data Science with expertise in Machine Learning, Deep Learning, Computer Vision, and Data Engineering. Skilled in designing and deploying AI models, building data pipelines, and creating analytical dashboards to deliver tangible value to projects.

LANGUAGES

Arabic (Native)

French (B2)

English (B2)

SKILLS

AI & Data Science
Supervised and Unsupervised Learning, Machine Learning, Deep Learning, Computer Vision, Python (NumPy, Pandas, Scikit-learn), Deep Learning Frameworks (TensorFlow, Keras, OpenCV)

Data Engineering
ETL pipelines (Talend, Python), data processing, transformation, modeling and structuring, integration and automation, data visualization and monitoring (Power BI, Grafana)

Databases
MySQL, PostgreSQL, MongoDB, Firebase, InfluxDB

Development & Frameworks
Django, Flask, Express.js, C#, .NET, Angular, Flutter, JavaScript, TypeScript, HTML, CSS, Node-RED

Virtualization Tools
VMWare, VirtualBox, Microsoft Virtual Desktop

Personal Skills
Creativity, Problem Solving, Project Management, Adaptability, Perfectionism

INTERESTS

Football, Music, Movies & Series, Séries, Technological Innovation, AI & IoT Trends

EDUCATION

National Engineering Degree in Computer Engineering
Central Private Polytechnic School of Tunis – POLYTECH
06/2022 – 2025

Applied Bachelor's Degree in Electrical Engineering : Automation and Industrial Computing
Higher Institute of Technological Studies of Nabeul
2017 – 2020

ACADEMIC PROJECTS

Apartment Sale Price Prediction – Greater Tunis
- Automated collection of real estate listings, data cleaning, feature engineering, and training of Machine Learning models to predict sale prices.
- **Technologies & Tools:** Python, Jupyter Notebook, Web Scraping (Selenium), Scikit-learn, Django

Instagram Users' Interest Prediction
- Data extraction and classification of user interests using a hybrid NLP and Computer Vision model, integrated into a web application.
- **Technologies & Tools:** Deep Learning models (BERT, ResNet50), Python, Jupyter Notebook, Apify Instagram Scraper, Django

Plant Disease Detection Using Artificial Intelligence
- Developed a CNN model to detect leaf diseases from images, with advanced preprocessing, visualization, and a web interface for inference.
- **Technologies & Tools:** Python (Pandas, NumPy), Deep Learning models (TensorFlow, Keras, OpenCV), Django

STAGE

Final Year Project – Smart IoT Greenhouse
Shelley Tunisie
02/2025 – 05/2025 | NABEUL, Tunisie
- Designed an IoT-based smart greenhouse with automated control.
- Developed AI models for growth prediction and image analysis (92–95% accuracy).
- Built a Flutter mobile application for remote monitoring and control.
- Implemented a secure Node.js / Firebase backend for user management and real-time data synchronization.
- **Key Skills:** IoT, AI, Python, Flask API, YOLOv12, Render, Flutter, Node.js, InfluxDB, Grafana, Firebase, Cloudinary

Personal Professional Project 2 – ICT Test Log Analysis
ATEMS
10/2023 – 12/2023 | ESPACE DE PRODUCTION, BORJ CÉDRIA
- Collected, processed, and analyzed ICT tester logs to optimize electronic board diagnostics.
- Developed automated scripts for data extraction and structuring.
- **Key Skills:** Python, MySQL

Personal Professional Project 1 – Online Assistance Chatbot
The Tunisian Post
01/2023 – 03/2023 | Tunis
- Designed and developed an online assistance chatbot to enhance user interaction.
- Integrated an interactive web interface for real-time consultation and communication.
- **Key Skills:** Python, HTML, CSS, JavaScript

EXPERIENCE PROFESSIONNELLE

ICT Test Technician
ATEMS
01/2021 – 12/2023 | Soliman, Nabeul
- Diagnosed, detected, and repaired faults on electronic boards.
- Debugged and updated ICT programs on SPEA, TAKAYA, and TRI testers.
- Performed preventive and corrective maintenance on testers, interfaces, and ICT/FCT test benches.
